PROFILE

Systems Engineering graduate with broad hands-on experience across the full development stack — frontend, mobile, backend, databases, and cloud. Comfortable picking up new languages and frameworks quickly, with experience working in agile teams and direct client communication. Seeking a Full-Stack Developer position where I can put a diverse technical toolkit to work and keep growing alongside a strong engineering team.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java, C++

Frontend & Mobile: React, Next.js, React Native, Tailwind CSS, Bootstrap, Sass, Android Studio

Backend & Frameworks: NestJS, ASP.NET Core, Node.js, Spring Boot, Django, REST APIs, Firebase

Databases: PostgreSQL, Oracle, SQL, NoSQL

Tools & Cloud: Git, GitHub, AWS, Azure, Vercel, Figma, Notion, Stripe

Game Development: Godot, PlayCanvas, Blender (basic), 3D modeling, interactive scripting

WORK EXPERIENCE

Mobile Software Development Intern

Remote

HyperReality — Guatemala [\[LinkedIn\]](#)

Jul 2025 – Nov 2025

- Built full-stack mobile features using **React Native**, **Android Studio**, **Firebase**, **NestJS**, **Django**, and **Stripe**, delivering functional modules within weekly agile sprint goals.
- Collaborated with a teammate under technical supervision, iterating based on feedback from client-facing demos.
- Maintained direct communication with clients to present progress, gather requirements, and apply improvements.

EDUCATION

National University of Costa Rica (UNA)

San José, Costa Rica

Bachelor's in Information Systems Engineering

Feb 2020 – Nov 2025

PROJECTS

ProjectLedger [\[Live\]](#) [\[Frontend\]](#) [\[Backend API\]](#) — Next.js · C# · ASP.NET Core · REST API · SQL · Vercel

- SaaS MVP for project financial management: tracks income, expenses, payment methods, and cash flow per project. Features **AI-powered OCR** for receipt scanning, a **financial chatbot (Aria)**, multi-currency support, team collaboration, and tiered subscription plans (Free / Basic / Premium).

CineMatch — React Native · Firebase · Expo · TypeScript — [\[GitHub\]](#)

- Mobile app to save and rate movies with a **real-time user-matching system**: when two users rate similar films recently, they get connected and can chat in-app.

SGIAvalom — TypeScript · React · Node.js · PostgreSQL · Express.js — [\[GitHub\]](#)

- Rental management system for multi-building property owners, handling tenant records, lease contracts, and rent accounting from a single dashboard.

ClinicaUNA — Java · JavaFX · Oracle 21c · PL/SQL · REST · Payara — [\[GitHub\]](#)

- Desktop application for medical records and appointment management, communicating via REST web services with a Payara server and an Oracle 21c database.

LANGUAGES

- **Spanish:** Native **English:** B1 — University diagnostic exam (actively improving)
